EVANS & REEVES NUL

255 S BARRINGTON AVE., WEST LOS ANGELES, CALIF.

PRICE LIST Season of 1943

WING TO THE WAR and in deference to the Government's request to save paper, the Evans & Reeves Nurseries will not issue a revised general catalogue during the season 1943-1944. In order that our 1942 catalogue may be kept up to date, the following revised price list is announced at this time. In general, it will be found that higher material and labor costs have forced small upward revisions on certain items, although others have been reduced in order that encouragement may be given to their widest possible distribution.

It is the intent of the Evans & Reeves Nurseries to publish special catalogue supplements on certain lines in which we have acquired a dominant interest and reputation. As far as is now known, these supplements will include FUCHSIAS, BEGONIAS and PELAR-GONIUMS; CYMBIDIUMS and other HARDY ORCHIDS, BROMELIADS, HOUSE PLANTS and CAMELLIAS. Those among our clients who may wish to receive these supplements are urged to request them at this time, in order that proper notation may be made on our mailing lists.

Attention is called to our terms for shipment outside our regular delivery zone. A charge of 10% of the amount of the order should be forwarded for packing and crating, with a minimum of \$1.00 on any order less than \$5.00. All shipments will be sent charges express collect unless otherwise provided.

Hibiscus

The Evans & Reeves Nurseries are pleased to offer what we believe to be the finest and most complete collection of Hibiscus in the West. Included are many new seedling varieties and sports not previously catalogued or offered for sale, for which special inquiry will be welcomed. Those who are only familiar with the older types will be astonished at the extraor-dinary beauty and form of these splendid new subjects, which truly must be seen to be appreciated. In the listing below, we call attention to the superb Hibiscus named under "Latest These have a more dwarfed habit than the old Hibis-

Introductions."

cus, particularly good foliage, and magnificent overlapping petals.

Trees

The Erythrinas are among the most striking flowering shrubs and trees available for subtropical planting. We stock fifteen varieties, probably the widest selection in the country. The Erythrinas like full sun and a reasonable supply of water and prefer warm weather, although some of the shrub forms will stand brief cold spells of 18° or 20°. Originating in widely separated parts of the world, color, shape and characteristics of growth differ considerably among the various members of the family, some being deciduous while others

siderably among the various members of the family, some being deciduous while others hold their leaves virtually the year 'round. Splendid in appearance these trees should be widely planted wherever circumstances will allow.

Vines

Vines are among the several specialties of the Evans & Reeves Nurseries and will be found here in unusual variety and interest. Attention is called particularly to our celebrated collection of Bougainvilleas, Passion Vines, Trumpet Vines, and outstanding individual subjects such as the Bauhinias, Beaumontia, Bomarea, Mandevillea, Oxera, and both white and yellow Trachelospermum. We stock the largest showing of Bougainvilleas in the West, including several new and rare varieties of exceptional merit. Among these we consider Bougainvillea Panama Queen ("Sweet Pea Pink") to be especially deserving of mention. Of the Passion Flowers, Pfordi has won great widely planted, as is Distictis Cinerea ("Va-

popularity and is being widely planted, as is Distictis Cinerea ("Vanilla Scented Bignonia") among the trumpet vines. Those who enjoy the graceful flow and form of a noble and aristocratic vine should also by all means consider Beaumontia Grandiflora ("Easter Lily Vine") from the Himalayas.
